This book explores competing definitions of Hellenism in the making of the Greek state by drawing on critical historical and geopolitical perspectives and their intersection with difference and exclusion. It examines Greece's central role in shaping the state system, regional security, and nationalisms of the Balkans, the Black Sea, and the Eastern Mediterranean regions. Understanding the Greek state's social constitution helps learn about the past and present intentions and strategies as well as local, national, and European notions of security and identity. The book looks at the relation of subaltern communities to state power and the state's ability and willingness to negotiate difference. It also explores how the state's identity politics shaped regional geopolitics in the past two centuries. Chapters present case
